4 December 1987

MEMORANDUM FOR THE ASSISTANT DEPUTY FOR SCIENTIFIC AND
TECHNICAL INTELLIGENCE

SUBJECT: SUN STREAK Operational Report - Project 8714 (U)

1. (S/NF/SK) During the period of 19 November 1987 to 30 November 1987 inclusively, five remote viewers conducted 12 sessions in an effort to describe an event of interest that occurred during the Spring of a given year at 9732/11517.

a. (S/NF/SK) Viewer 095 described the general target site as a dry, flat, area where a group of trained personnel dressed in similar clothing witnessed a sudden occurrence. An apparatus having a peculiar "circular component", produced a strong powerful, complex, rhythmic, greenish form of energy that shook the earth at the target site. People at the target area were awed, perplexed, and subsequently died as a result of the burst of energy. Viewer 095's summary is at Tab A.

b. (S/NF/SK) Viewer 079 described the general target area as flat, hot, dry and sandy; it was an area with a Middle Eastern flavor. The specific target site was a large circular area that served as a military assembly/storage point for apparent weaponry described as slender, brown objects. "Tribal people" located at the foot of nearby mountains (TAB B), fired a weapon described as a "fire contained device" that resembled an "outmoded cannon." An estimated 25 to 30 people died as a result of this action. See TAB C. The results of the explosion appeared contained and limited to a well-defined, circular area at the target site. In a subsequent session, 079 described the weapon as a "hand-held device". Subsequent to the explosion, military aircraft appeared at the target area but were powerless to provide any meaningful assistance. The victims were badly burned and the removal of their bodies from the target area proved to be a difficult chore. Viewer 079's summaries are at TAB D and E.

c. (S/NF/SK) Viewer 003 described the target site as a barren, rocky, desert locale where interspersed, windowless, adobe-type structures were visible. Rolling hills were in the background. An attack was launched against "resistance fighters" located in a staging area. The purpose of the attack was to evaluate the destructive power of a weapon that involved the use of a "magnetic fire control apparatus" identifiable by the presence of a component resembling a "cathode ray tube" (TAB F). An aircraft used as a forward observation post, was in the target area at the time of the incident. The weapon was complex and bulky so that special arrangements were needed to transport the weapon from one place to the another. The weapon generated a great deal of heat and ultimately caused a "disintegration of object-integrity." The event seems to have occurred less than two years ago. Viewer 003's summary is at TAB G.

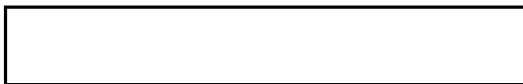

d. (S/NF/SK) Viewer 011 described the target site as a flat, open, area situated between two hills. During his early sessions of 20 and 23 November 1987 respectively, Viewer 011 described the event as an accidental explosion that resulted in the formation of a toxic cloud originating from the base area of nearby mountains (See TAB H). In subsequent sessions, Viewer 011 described a device/weapon as being large, round, curving, hollow and tubular (See TAB I). The weapon produced a glowing fireball, a dome-shaped ball of energy that produced extreme heat, pressure, and excruciating burning sensations. The victims of this explosion were "hill people - herders" killed where they stood, in a circular configured area where nothing was left but scorched, grey ash. The weapon was not initially meant or designed to be used as a tactical weapon. It was originally conceived as a surveillance device. The presence and subsequent crash of a helicopter in the target area were also associated with the event. The weapon was developed in a typical, large, military complex (TAB J) and was subsequently tested at a site consisting of a square building with a firing path leading to a series of concentric circles (TAB K). The weapon appeared related to lasers. Related summaries are at TABS L, M, N, and O.

e. (S/NF/SK) Viewer 018 described an event involving the presence of a thick, grey cloud spreading in an estimated half mile radius over a flat terrain amid interspersed adobe type structures. The area reminded 018 of a locale typical of the southwestern part of the US. (018 is from Texas). See area sketch at TAB P. The cloud formation resulted from an "eruption" emanating from a squarish appearing box (SEE TAB Q). Exposure to the cloud resulted in a burning of the skin, a painful exertion of pressure, and the distortion of bodily joints. The event appeared to be the result of an industrial type accident in view of the observed presence of personnel wearing blue, hard-hats in the area. Viewer 018 perceived the presence of several hundred people affected by the cloud. Many were lying along the road while others appeared to be slowly making their way along a road towards a nearby area serving as a refugee camp. Related summaries prepared by Viewer 018 are at TAB R and TAB S.

~~SECRET~~

2. (S/NF/SK) COMMENTS: General correlation among the viewers predicates a high probability that the nature of the event consisted of a deliberate attack by one group of people against another group. It is also likely the event took place in a dry, arid, flat area with mountains in the background, an area one would associate with a Middle Eastern country. That the cause of the explosion was caused by an energy or laser-related weapon is a moot point and may be the product of analytical overlay, a spillover from a project conducted within the past year regarding the possible involvement of a directed, energy-related weapon. Request customer provide an evaluation of this effort in terms of intelligence value and use of the information provided above.

SESSION SUMMARY
23 NOVEMBER 1987
SOURCE 95

The site is a dry, arid, flat, empty, dusty land colored with lots of reds and browns, ADL like the southwest. The land is old (untouched?). At the site a handful of people are witnessing an abrupt event. They are wearing similar standardized clothing part of which is white. The people belong together, a team, and are organized/ specialized. The event they are watching involves energy. Strong, powerful, complex, rhythmic, greenish energy. A curving or circular component is associated with the energy. Motion also is associated with the energy as is motion that can be felt in the land. The people are very still as they watch the event. They are in awe, as if their breath has been knocked out of them emotionally. The awe turns into strong fear as they sense/feel the energy. Then they feel nothing (death?).

Summary

8714

DURING TODAY'S TRAINING SESSION, I FIRST KEPT SEEING MEN INVOLVED IN A LOT OF ACTIVITY. SOME MEN WERE DRESSED IN VERY FORMAL DECORATED MILITARY UNIFORMS.

THE MEN WERE WORKING IN A LARGE, CIRCULAR AREA WITH SMALL ROLLING HILLS AND I COULD SEE MOUNTAINS. THE LAND WAS BROWN AND GREEN AND THE AREA WAS HOT AND DRY. THE LAND WAS FLAT AND AT ONE POINT I THINK I COULD SENSE BAND. THERE WERE WIDE ROADS OR PATHWAYS THAT SERVED THE PURPOSE OF BORDERS. THESE MEN SPOKE IN A MIDDLE EASTERN LANGUAGE WITH A TOUCH OF EUROPEAN FLAVOR IN THE ACCENT.

I COULD SEE AIRPLANES FLYING OVERHEAD AND THESE MEN WORKED WITH BIG OBJECTS OR WITH A SINGULAR BIG OBJECT.

THE OBJECT WAS SPREAD OUT AND IT CAN SHOOT OFF. THE OBJECT HAS LIGHT ASSOCIATED WITH IT AND IT HAD MANY PARTS THAT JOINED IT TOGETHER. WHEN STANDING STRAIGHT UP, IT WAS TALL AND SLENDER AND BROWN. IT WAS HEAVY AND THICK UNDERNEATH AND HAD A ROUND DOOR. THE OBJECT COULD SWAY AND SWEEP BACK AND FORTH.

IT SEEMED HOWEVER, THAT THE MEN WERE NOT TOO CONCERNED WITH THE OBJECT AND THAT THEY WERE MORE CONCERNED WITH POLITICAL ISSUES. THE MEN DID NOT ARGUE OUT LOUD OR FIGHT WITH THEMSELVES BUT INSIDE THEIR HEADS THEY DID NOT ALL THINK ALIKE. THEY WERE MORE CONCERNED WITH POLITICAL ISSUES OR POLITICAL EVENTS. THESE MEN WERE ALSO INVOLVED WITH DEALING OR TRADING OR MARKING OFF WITH OTHER PEOPLE. THESE MEN DEALT DIRECTLY WITH OTHER PEOPLE.

SECRET

TAB D

VIEWER 079

8714

~~SECRET~~

THEN I FELT THAT I CAME TO A VERY ROUGH FEATURE IN THE LAND THAT WAS MAN MADE. I HAD A FEELING THAT MEN WERE TURNING THINGS UPSIDE DOWN AND BACKWARDS. AT FIRST I FELT THAT THERE WAS A NATURAL DISASTER BECAUSE I COULD SEE DEAD PEOPLE. PEOPLE'S BODIES WERE WRAPPED UP. AT FIRST IT SEEMED THAT THE SUN AFFECTED THEM BUT LATER ON I COULD SEE THAT THERE WAS AN EXPLOSION.

AFTER LOOKING AT THE SITUATION MUCH CLEARER, I COULD SEE THAT THESE MEN WITH THE OBJECT WERE MOVING UP FROM THE SOUTH. IT SEEMED AS THOUGH ANOTHER GROUP OF MEN DOWN FROM THE MOUNTAINS WHICH ARE IN A NORTH EAST DIRECTION AND CAUSED A FIRE OR EXPLOSIONS TO OCCUR. THEY IGNITED A FIRE. IT SEEMED HOWEVER, *Salvato* THAT THESE MEN UNDERSTOOD NATURE AND COULD MAKE THIS OCCURRENCE SEEM NATURAL. THESE MEN MEASURED THE AREA AND WITH THE HELP OF NATURE COULD MAKE AN EXPLOSION TO KILL THESE OTHER MEN. THESE MEN THAT CAME FROM THE MOUNTAINS REMINDED ME OF A TRIBE OR NOMADS. THEY SPOKE A MUCH DIFFERENT LANGUAGE THAN THE OTHER MEN WITH THE OBJECT.

(AFTER THE EVENT TOOK PLACE, I COULD SEE A MILITARY MAN DRIVING INTO THE AREA TRYING TO CLEAN IT UP BUT THE JOB WAS TOO BIG FOR HIM TO HANDLE. ALSO, I COULD SEE AIRPLANES FLYING OVERHEAD BUT THEY COULD NOT CLEAN UP THE AREA EITHER. THIS MAN THAT WAS DRIVING A VEHICLE HAD THE RANK EQUIVALENT TO A MAJOR AND HE WORE A PIN THAT LOOKED LIKE A NAZI SYMBOL OR CLUSTER ON A WHITE SCARF THAT WAS AROUND HIS NECK. (THIS SYMBOL WAS ALSO ON HIS POCKET AND THE SYMBOL WAS ALSO ON THE VEHICLE. IT WAS RED AND GOLD.)

THIS EVENT OCCURRED WHEN THE WEATHER IS THIS AREA IS KNOWN

~~SECRET~~

~~SECRET~~

TO BE EXTREMELY HOT. THE WEATHER AT FORT MEAD AT THIS TIME WAS
QUITE A BIT COOLER BUT WARM AND BREEZY. PEOPLE WERE WEARING
SWEATERS HERE BUT THEY WERE TOO WARM IN THEM.

AT THE END OF THE SESSION, I FELT THAT RELIGION PLAYS A VERY
SIGNIFICANT ROLE IN THIS AREA.

Agony!

~~SECRET~~

~~SECRET~~SOURCE 079
25 NOV 87*Summary.*

DURING TODAY'S SESSION, I WENT BACK TO THE AREA WHERE AN EVENT TOOK PLACE. AT THIS TIME, I COULD SEE THAT THE MEN FROM THE HILLS CAME OUT FROM MOUNTAINS AND THEY COULD VISIBLY BE SEEN BY THE MILITARY MEN. IT SEEMED AS THOUGHT THEY PLANNED OR SCHEMED THE EXPLOSION WITH EITHER A SYSTEM OR BY THEMSELVES. THERE WAS SOME TYPE OF APPARATUS THAT THEY BROUGHT OUT FROM THE MOUNTAINS AND SAT ON THE HILL WHERE IT COULD BE SEEN. THIS APPARATUS COULD MOVE OR SWING BUT IT HAD MOTION ASSOCIATED WITH IT. IT SEEMED THAT THE TRIBAL MEN AND THIS SYSTEM WOULD DO THE SAME THING OVER AND OVER AGAIN UNTIL THE MILITARY MEN NEVER QUESTIONED THEM OR LOST INTEREST. THEN AT THIS POINT, AN EXPLOSION OCCURRED AND THE FIRE CAME DIRECTLY OUT OF THIS APPARATUS. THE FIRE WAS CONTAINED. BY THIS I MEAN THAT THE FIRE SHOT OUT AND ONLY REACHED THE TWENTY-FIVE OR THIRTY MEN THAT IT KILLED BUT IT NEVER SPREAD OUT INTO OTHER AREAS OF THE LAND. IN OTHER WORDS, THE FIRE WAS NOT LIKE A FOREST FIRE. IT DID NOT SPREAD. THE EXPLOSION COULD BE HEARD. IT WAS A DENSE ROARING SOUND. THE MEN THAT WERE KILLED FELL BACKWARDS. THEY WERE BURNT FROM THE EXPLOSION. I COULD SEE PATCHES OF BLACK. WHEN I WAS AROUND THE DEAD MEN I COULD SEE THE COLORS WHITE WITH PATCHES OF BLACK. AFTER THE EXPLOSION, THE MILITARY MAN WHICH I DESCRIBED IN THE FIRST SESSION CAME INTO THE AREA AND TRIED TO MOVE THE MEN BUT HE COULD NOT. HE WAS TRYING TO LIFT THEM AND MOVE THEM BUT HE COULD NOT. IT WAS ALSO AFTER THE EXPLOSION THAT THE AIRCRAFT

~~SECRET~~

TAB E

VIEWER 079

6714 - 35 NOV 87

WAS TRYING TO FLY IN BUT THEY COULD NOT DO ANYTHING EITHER. THEY COULD NOT GET THE DEAD MEN OUT OF THE AREA.

DURING THIS SESSION I FELT THAT THERE WAS A STRUCTURE SOMEWHERE. I DON'T KNOW HOW CLOSE IT WAS TO THE AREA BUT IT WAS EITHER A FACTORY OR A PLANT THAT PRODUCED GOLD. I COULD SEE HARD, HEAVY, BIG PIECES OF GOLD SLIDING DOWN A CONVEYOR BELT AND BEING DRIVEN. I ALSO KEPT SEEING THE LETTERS OR WORD "SILKTY" WHICH HAD SOMETHING TO DO WITH LOCATION.*

- The device which killed the men was a primitive or improvised device & reminded me of a gunpowder.

- There were "moldings" that were smooth, light & hand held associated with the primitive device they were hot.

The fire was measured.

~~SECRET~~
Summary

Site is located in a barren area, desert-like, with little vegetation, lots of rocks, and brownish-tan hills somewhere in the vicinity. There are a few to several low structures involved which seem to have thick walls, low ceilings, and few or no windows. The sense of being "out in the middle of nowhere" is quite pronounced. People are associated with these structures, but don't seem always to be present on a continuing basis. The event associated with the site involves a fairly large group of people, both male and female, and they seem to be dressed in non-Western styles of clothing, "like" Third-world. The setting is non-US. There is the sense of antagonism, anger, anxiety, confrontation, insistence among these people. A sudden impression is present of intense heat, fire, smoke, and flames. The idea of conflagration and violence is present. This "conflagration" is instigated by some outside agency located at a distance and at a higher elevation from the site. An aircraft seems to be orbiting the site, either directly involved or in an observational role. The impression of the actual effects is that the heat is "driven"--it wouldn't exist under normal conditions but is forced to be there. The site that is thus under "attack" seems to involve some sort of "staging area," connected with some sort of idea of resistance (AOL Afghanistan), but is not really of any extraordinary significance. The agency directing the destructive force at the site seems less interested in what the target is than in seeing how well the destructive media they are using works; it's almost a clinical evaluation with real people as the target. The people thus targeted would not be surprised to be the object of some sort of aggressive activity in response to some of their own attitudes and activities; but they are very surprised at the form the attack upon them takes.

The actual equipment used doesn't superficially look like a weapon; its effects are fully out of proportion to its superficial appearance. It could even be configured in different ways and still produce pretty much the same effect. Effects on target involve a loss of cohesion at a (AOL/S) molecular level. It's as if all the little component parts of an object are put into great agitation or turmoil, generating quantities of heat and creating disintegration of object-integrity/structure. Disruptive or disintegrative are appropriate words to describe the effects. The heat comes from the effects and not from the operant object/weapon itself. Impression of some sort of magnetics involved for control. AOL impression of a cathode ray tube. Size may be about 3'x2.5'x2.5'. Entire apparatus requires specific transportation--it's fairly large and bulky and complex. Incident seems to have occurred less than two years ago.

SESSION SUMMARY

SESSION: 20 NOV 87; 1320HRS-1437HRS

First impressions are of a tall, angular, vertical structure. Focusing on sometime in the past, the impression of a land/water interface becomes evident. There seems to be a large, open body of water and also a closed, or contained body of water. The land appears to rise, with a gentle incline, to a somewhat rolling, flat, open area (see sketch, page 7). The area here is windy, breezy and almost seems desert-like. There are people associated with this location and they seem lost, confused, dazed, in a state of shock. Survival is foremost on their mind. There is a feeling of a life-or-death situation, dehydration and starvation. There is a small group of individuals who have been trained to work together, like freedom fighters or partisans.

Focusing on a "past event" evokes colors of red and orange; something

~~SECRET~~

~~SECRET~~

There is a strong wind associated with this event, and the feeling of dread, fear, confusion, then only darkness. There is also an object associated with this event. It is large, round, curving, hollow, tube-like and colors of yellow and orange can be found inside.

~~SECRET~~

~~SECRET~~

SESSION SUMMARY

ILLEGIB

011

8714

23 NOV 87

SESSION: 23 NOV 87; 1320-1410

Just prior to the targeted event the color red or reddish-orange is significant. There is the feeling of confusion, panic, and hysteria among the local populace. Also to be found in this area are domestic animals, such as goats and sheep. These animals also seem to be in a state of panic and confusion. There is something in the air, above, issuing a warning, like a helicopter with a loudspeaker. The people on the ground are confused; they don't, or can't understand.

Following this warning, there was a crash-like event, an explosion,
(AOL - Afghanistan).
a toxic cloud, and death. There is an impression that this event was an accidental happening, not something that was planned or intended.

The source of this event, or the origin, is located some distance away

(see sketch, page 3), with mountains visible in the background. Again, there

~~SECRET~~

TAB M

seems to be a toxic cloud associated with this event. The cause of this

~~SECRET~~
it is two things/elements coming together creating a violent reaction.

At the source there appears to be some kind of man-made structure.

Inside this structure is where the event seems to originate. The color blue,

cobalt blue is predominate, there is a feeling of intense heat, and something

like exploding steam. (AOL-Chernobl)

1-5-2

SESSION SUMMARY

SESSION: 25 NOV 87, 1012-1059 HRS

IN THIS SESSION WE HAVE A SMALL GROUP OF PEOPLE WHO ARE CLIMBING OVER THE CREST OF A HILL. THERE IS SOME SORT OF OBJECT OR DEVICE LOCATED ON A HILL NEARBY. THE TERRAIN BETWEEN THESE TWO HILLS SEEMS RATHER FLAT AND IS GRASSY WITH LOW BUSHES/SHRUBS. WHILE CROSSING A PARTICULARLY OPEN AREA, SOMETHING HAPPENS TO THIS GROUP OF PEOPLE THAT CREATES FEAR, PANIC, AND CONFUSION. THE SOURCE OF THIS APPEARS TO BE THE OBJECT/DEVICE (see sketch, page 1).

AT THIS POINT IN THE SESSION THERE IS AN AOL OF LASER D AND AFGHANISTAN. THE FOLLOWING INFORMATION MAY BE A PRO OF "AOL DRIVE".

a. I feel fairly certain that this object/device was not designed or meant to be used as a tactical weapon. Its use as an offensive weapon was discovered quite by accident. I feel that this device was designed to be used as a surveillance tool.

b. There appears to be a HIND helicopter in the air near this site. I perceive that this helicopter goes down, or crashes in this area.

c. It is possible that there are two different parts to this object/device one may be the weapon and the other may be a laser device for aiming it.

VIEWER 011
25 NOV 87
8714

SESSION SUMMARY

8714
27 NOV 87

SESSION: 27 NOV 87, 1305-?

In this session we begin by describing an event. There is something like a glowing fireball, a dome-shaped bubble, or ball of energy that encompasses a circular area on the ground. Within this bubble there is a feeling of enormous pressure, heat, burning, and excruciating pain. Then there is only darkness and black. There is nothing left within the circular area but scorched earth and grey ash.

There are people in the area where this event takes place. One of them is wearing a pair of loose-fitting, greenish-gray trousers with big pockets, boots, and a brown coat made of coarse, wool-like homespun material. This person has very rugged and weathered features, like a herder or hill-person.

An attempt to describe the site where the object that produced this event is manufactured/assembled is depicted in the sketch on page 3 of this session. It looks like any typical, large, industrial complex.

on page 4 of this session. There is a square building, on a mound, a visible

straight line, or path leading from the mound to white concentric circles on

the ground. This signature should be quite visible from overhead. I have

the feeling that this test facility may also be associated with LASER

research / testing.

DT-S

SESSION SUMMARY (C/SS)

SG1J

DT-S (ATTN:)

1. (S-SS) Statistics: Viewer: 018
Session date: 24 NOV 87
Mode of operation: ERV

2. (S-SS) The impressions of the session were:

a. The session began with impressions of a large place with many people in it. Many of the people were lying on the floor in lines.

b. After this initial impression, there was a lot of "jumping around" to many different places. All of these places seemed to be small homes. There were repeated impressions of breakfast tables with noone at them, and television sets with noone watching them. There was one impression of a baby wrapped up, but with a burn on its face. There was also an impression of a fire extinguisher hanging on the wall, badly charred and burned.

c. There was another impression immediately following that of a ragged edged, large squarish hole in the ceiling (see drawing #3). At the bottom of the hole was a squarish "box" about the size of a suitcase or large briefcase (see drawing #1).

d. Once again back outside, there were more impressions of a housing area with small, inexpensive homes. I then saw a thick, grey cloud high in the air, spreading over one of the homes. Told to enter the cloud and describe my impressions of it, I felt the "stinging" sensation (AOL: like the sand hitting your bare skin in a dust storm). The cloud seemed to have come from the box mentioned in c., above. It had issued out of the box in a vertical black column (see drawing #2). The thick grey cloud expanded to approximately 1/2 mile in all directions, falling on people and covering them. Many people were seen running past parked cars. When asked what this grey cloud does to them, it appeared that it:

- 1) resulted in "burned" skin.
- 2) affected joints in such a way that the people seemed to get "old".
- 3) caused pain. The pain which I felt was not a sharp, biting pain, but the kind of dull pain.

TAB R

~~SECRET~~

pressurized aching pain which results in the head when one has sinus troubles, accompanied by a cold and a headache to boot. It was very debilitating.

e. Tasked with describing the area and the surrounding conditions, the following impressions were perceived (see drawing #4):

- 1) The climate was mild. Skys a little overcast, but not grey and cloudy.
- 2) The area of concern seemed to be on the outskirts of a city (which appeared to be behind me). There was a large structure nearby (slightly behind me, to my left) with plenty of verticals, and "JUNKY" looking buildings (AOL: like a refinery).
- 3) To the right of me, the edge of the city seemed to stretch off into the distance.
- 4) Very far away, to the right front of me, I could see the same curving coastline which I saw much nearer in the previous session.
- 5) The rest of the area was flat, but there was a slight impression that there may have been some low mountains hidden from me by the tall structures.

f. Told to report anything else which might be important, there were two impressions which seemed to deal with the last session's impressions:

- 1) One of the men who had "joined the others in turning blue and wearing the blue hats" (see report, 19 NOV 87) took his blue hat off and laid it quietly to the side, as though to divorce himself from it.
- 2) Another of the "blue" men was perceived, standing with several other caucasian men, in hard hats, looking down into the hole, previously described as a hole in the ceiling. When I was told to ask him what he was doing there, he answered, "I had to see it." When I was told to ask him what he had had to see, he replied, "What I had done."

~~SECRET~~

memorandum

DATE: 30 November, 1987

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J

TO: DT-S (ATTN:)

1. (S-SS) Statistics: Viewer: 018
Session date: 30 NOV 87
Mode of operation: ERV
2. (S-SS) The impressions of the session were:

a. The session began in a place which had a lot of pipes and metal walls with vertical lines. There was a person here wearing heavy work clothes, heavy gloves, and a hard hat.

b. There was a lot of jumping around after this initial impression, but the next main impression was the grey cloud (tasked). The grey "smoke" (or whatever the cloud is made of) had a very dry, slick feel to it (AOL: like graphite or dry oil).

c. Again there was a lot of jumping around, and settling on a person leaving a box in an unidentified place. This box was silver in color, about the size of a suitcase, and had rounded edges. It was lying flat. The "box" seemed to have air vent slits in it. The following impressions were gained from inside the "box":

1) Tubes or wires plugged into something at an angle. (see drawing #1)

2) There was a perception of a piece of metal sheet which was "flopping loose" and made contact with a "plunger". When that happened, the "plunger" drew back, allowing a second part to fall into place. This part mechanically moved a partition between a light area and an area which was perceived as having a pile of blackish powder. The powder was then seen to develop fire "blowing sideways" across the top away from the light area. The black powder began to turn into a molten, burning mass. The fire which blew sideways across it blew directly into a metal wall. There was the perception that this metal wall was held in by plastic, and when it heated up, the plastic gave way. The metal wall then blew directly away, and through the resulting hole, I could see the ceiling of the room (making it seem, then, that "sideways" was actually "up").

3) The fire and smoke had a "plastic" smell about it. It did not seem toxic, but it did sting, and there was the feeling that it was trying to eat away at the lungs. It began to hurt to breathe.

~~SECRET~~

4) The cue "how many people were hurt?" brought the visual of being far above the cloud, and looking down to see it settle over people. The people were perceived "bumps" under it (AOL: like under a blanket). There were many of these "bumps", estimated in the hundreds.

5) A stage 6 was attempted to find the time. A gear was visualized, with the tooth pointing toward me being at the apex. The event seemed to occur approximately 3 or 4 teeth to the left (in the past). What period of time a single tooth stands for, I do not know.
